

Is your restaurant financial system helping you remain adaptable?

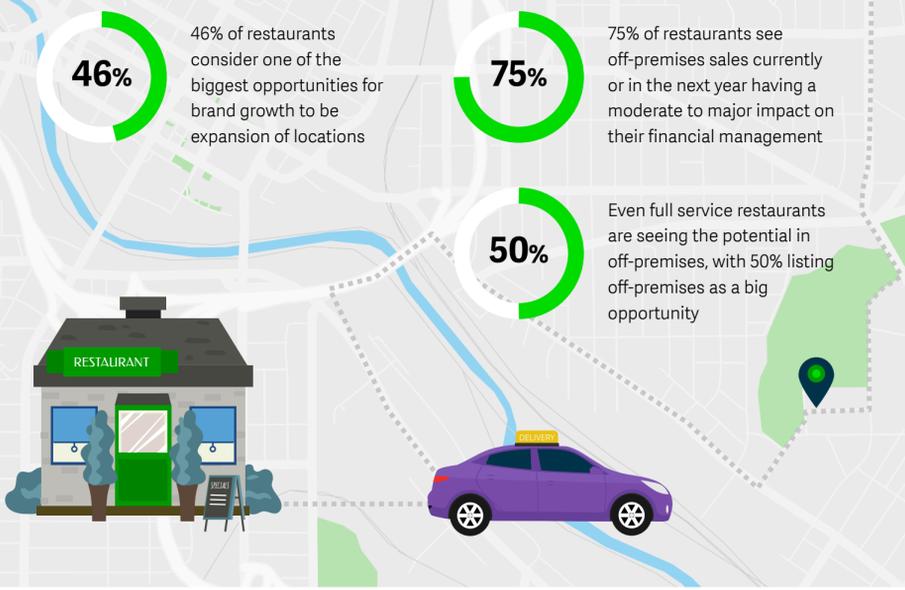

The National Restaurant Association partnered with Sage Intacct to conduct a survey in January 2020 to uncover restaurant finance professionals' top industry challenges and the essential capabilities to remain competitive in an ever-changing market.

Top-of-mind challenges for restaurants

And the market is changing...

Restaurants need to equip themselves with essential capabilities in their financial software.

Your accounting and financial software should enable you to steer your business in ever-changing market conditions.

Yet, over 85% of organizations on restaurant-specific accounting software find the software falls short in meeting long-term needs.

Top 5 desired features in accounting and financial software

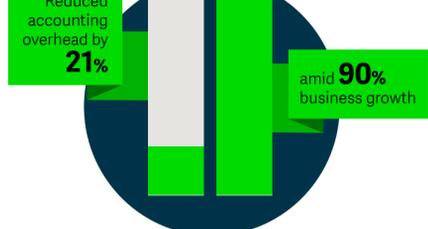

Sage Intacct's modern cloud financial management platform...

- 1 Automates and streamlines processes across entities to increase efficiency 25-50%
- 2 Integrates with best-in-class systems suited for your ecosystem through its open API
- 3 Analyzes real-time performance by drivers
- 4 Empowers with easy-to-use custom report writers and dashboards
- 5 Continuously consolidates multiple entities

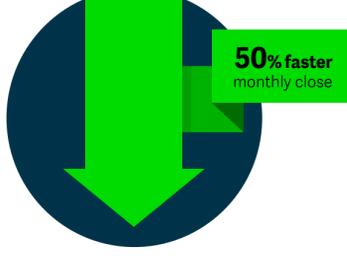

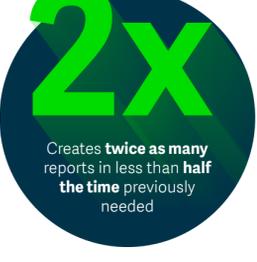

“ Now I love Sage Intacct and am probably one of its biggest fans. The beauty is its flexibility to fit any business' custom needs and provide automation that lets accounting departments thrive.”

Sean Skuro
Controller, Tender Greens

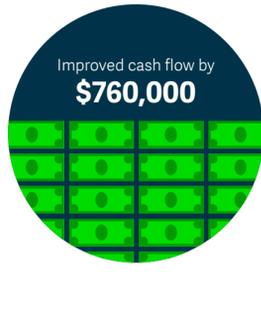

“ We really wanted a platform that would grow with us, was user-friendly, and would deliver regular updates that we didn't have to wait for or pay extra for... Sage Intacct has helped streamline our business by allowing us to create twice as many reports in less than half the time we needed in the past.”

Pam Bakker
Controller, Laird Management (Burger King franchisee)

“ We're seeing massive savings due to the automation we've accomplished with Sage Intacct. And rather than crunching numbers all day, we are seen as strategic business advisors to our client location units.”

Jeff Banaszack
CFO, Creative Dining Services

Sage Intacct is the leading accounting and financial management software. Born in the cloud and designed to let you focus on delivering customer satisfaction, driving revenue, and reducing operational costs.
